Bootstrap

Backend: Node.js,
Express.js, GraphQL,
REST APIs

Databases: SQL,
MongoDB, Firestore

**Authentication &
Security:** JWT, Security
Best Practices

Cloud & DevOps:
Firebase, CI/CD, Git,
GitHub Software

Practices: Clean Code,
SOLID Principles, Agile
(Scrum), Unit Testing

PERSONAL PROJECTS

Name The Game (08/2024 - 01/2025)

- Developed a React Native mobile app that allows users to post queries about games they cannot recall, using text descriptions or images.
- Built a community-driven platform where other users can view and help identify games, fostering engagement and interaction.
- Implemented clean UI/UX optimized for both iOS and Android to enhance usability and responsiveness.
- Used Redux for state management, integrated RESTful APIs for data and authentication, and streamlined versioning and deployment with Git and CI/CD.

Chatty 007 (11/2023 - 01/2024)

- Engineered a chat room application with Next.js, providing real-time communication capabilities adding 30% reduction in message delivery latency.
- Adopted seamless user interaction and responsive design, ensuring efficient performance and a user-friendly interface, resulting in a 40% increase in active sessions.

ACHIEVEMENTS

Member of college tech & coding clubs

Contributing to events, hackathons, and peer-learning activities while collaborating with teams on small-scale projects.
